

Home Learning Summer 1

Year 1 and 2

English – Writing/ SPAG (Core)

Year 1 – Children will receive phonics sheets linked to our phonics scheme- Little Wandle. Each week they will receive a sheet which links directly to sounds we have learnt in school.

Year 2 – Each Monday children will receive some SPAG questions. The questions cover all the KS1 spelling, punctuation and grammar objectives.

English

The children will always have a reading book to bring home. The children should be reading **daily** (this can be independently or with an adult), thinking about sounding out the words but also trying to understand what they are reading and discussing what they have read. Reading books must be brought back to school **every day**.

Mathematics (Core)

Maths homework will cover a range of areas that we have covered in school. In addition to the weekly homework:

Year 1: Please can you ask your children about capacity and volume. Maybe at home your child could measure the length and height of objects in the house. We will be learning about numbers to 50 next half term. Get a head start and practice early!

Year 2: Telling the time; o'clock, half past, quarter past, quarter to. Can you tell the time at home for different parts of routine?

Science

In Science we are learning about living things and their habitats. When your outside please could you and your child go on a habitat hunt. To see what habitats, you can find and think about what animal might live there and why. You can even talk about how the animals are suited to their habitats.

Geography

Create a weather chart at home. Children could make a tally of how many sunny/windy/rainy etc day there are over the next half term. Ask them questions about what they have found; were there more sunny days than rainy days? Why could this be? (link to seasons). For a super challenge, children could present their results on a bar chart.

Art

Children could create their own line drawings at home of objects, images or real life animals! They can practice the skill of drawing by looking closely at something and adding the detail they can see – revisiting the shading techniques we learnt about during our last art topic. It would be lovely to see some of these!

- **You must complete** all the core activities above (Mathematics and English).
- The other suggested home learning activities are optional.
- We would love to see some of the projects that you have worked on at home when you have completed them! Either bring your project to school to show your class or pop a photo of it on Class Dojo.
